Sustainable Land Management (SLM) is vital for soil health, biodiversity, and resilience. Climate change and human activity both accelerate land degradation, prompting urgent action according to the IPCC Climate Change Report (2023). The Mission Board for Soil Health and Food and the Joint Research Centre (JRC) reveal that 60–70% of EU soils are unhealthy. Global climate change and land degradation may displace 700 million people by the year 2050, highlighting the need for safeguarding land for Nature’s Contributions to People (NCPs); this need for safeguarding is further emphasized by the support for SLM of both global and European initiatives. The concept of "One Health" relates soil health to ecosystems and human health, while the seventeen SDGs of the 2030 Agenda integrate different land aspects. Land is central to research and innovation in the EU, as is the green–digital transition. The EU Soil Strategy for 2030, the upcoming Soil Health Law, and the EU Soil Observatory (EUSO) underpin strategies like the Farm to Fork Strategy, the EU Biodiversity Strategy for 2030, the Climate Adaptation Strategy, the Zero Pollution Action Plan, the Forest Strategy, the Organic Action Plan, the New Common Agricultural Policy Circular Economy Action Plan, all of which are integral to the European Green Deal. This Special Issue aims to provide a unique reference point that explores innovative approaches, case studies, and reviews, examining diverse sustainable land management concepts.
MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

**Open Access**
Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

**Author Focus**
Authors and editors profit from MDPI’s over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

**High Quality & Rapid Publication**
MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

**High Visibility**
Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

**Print on Demand and Multiple Formats**
MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
