The authors wish to make the following correction to this paper [1]. Due to an inadvertent error caused by calculation of the models, replace:
In our climatic conditions, up to 83.9%, 46.9%, and 6.9% of A. sterilis, L. rigidum, and P. rhoeas emergences would have been killed by SD1, while these values would go up to 86.2%, 62.4%, and 17.8%, respectively in SD2, and up to 91.9%, 77.7%, and 42.3% in SD3.

with:
In our climatic conditions, up to 83.9%, 46.9%, and 32.3% of A. sterilis, L. rigidum, and P. rhoeas emergences would have been killed by SD1, while these values would go up to 86.2%, 62.4%, and 47.3%, respectively in SD2, and up to 91.9%, 77.7%, and 68.1% in SD3.

The authors would like to apologize for any inconvenience caused to the readers by these changes.
