

Supplementary Materials: Immobilization Effects on the Catalytic Properties of Two *Fusarium Verticillioides* Lipases: Stability, Hydrolysis, Transesterification and Enantioselectivity Improvement

Fernanda Dell Antonio Facchini, Marita Gimenez Pereira, Ana Claudia Vici, Marco Filice, Benevides Costa Pessela, Jose Manuel Guisan, Glória Fernandez-Lorente and Maria de Lourdes Teixeira de Moraes Polizeli

Figure S1. SDS-PAGE analysis. (A) pure Lip1 adsorbed on octyl Sepharose (B) pure Lip2 adsorbed on octadecyl Sepabeads. M: molecular marker; 1: crude extract before immobilization; 2: octyl supernatant; 3: octyl derivative; 4: octadecyl derivative.
