The authors wish to make the following correction to this paper [1]:

Requested the correction of Figure 4, which had already been requested and was not carried out, we inform that in scientific terms the caption of the figure “ICD Groups A and J”, corresponds to another group of ICD10 diseases, and that the correct one is “ICD Groups I and J”, the group investigated in this research. We emphasize that this change does not interfere with anything in the analyses, discussions or conclusions, as they were inferred based on the ICD10 I and J group, and that the non-change leads to an erroneous understanding of the results.

The authors would like to apologize for any inconvenience caused to the readers by these changes.
