

Clinicopathological Significances of Tumor–Stroma Ratio (TSR) in Colorectal Cancers: Prognostic Implication of TSR Compared to Hypoxia-Inducible Factor-1 α Expression and Microvessel Density

Guhyun Kang, Jung-Soo Pyo, Nae-Yu Kim and Dong-Wook Kang

Table S1. The correlation between high microvessel density and overall and recurrence-free survivals in various subgroups according to the tumor stroma ratio.

Subgroups	Overall Survival (<i>p</i> -Value)	Recurrence-Free Survival (<i>p</i> -Value)
≥stroma 30%	0.132	0.297
<stroma 30%	0.458	0.458
≥stroma 50%	0.210	0.339
<stroma 50%	0.866	0.820
≥stroma 70%	0.004	0.005
<stroma 70%	0.053	0.042

p < 0.05 are highlighted in bold.
