

Supplementary Materials

Figure S1. Prevalence of illicit drug misuse at study baseline and follow-up.

Table S1. Attrition bias analysis between responders and non-responders on a basis of illicit drug use at baseline and gender.

	Responders	Non-Responders	Chi Square (p)
Illicit drug users			
Males	8	2	0.63
Females	11	1	(0.42)
Illicit drug nonusers			
Males	222	19	5.92
Females	191	5	(0.02)
Subtotal illicit drug users	19	3	2.51
Subtotal illicit drug nonusers	413	24	(0.11)
Subtotal males	230	21	6.17
Subtotal females	202	6	(0.01)
Total	432	27	

Note that group of non-responders for this analysis does not include participants who were not present at the baseline testing (38 adolescents) and 4 participants who did not specify gender.
