Journal of *Sensor and Actuator Networks*

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Lei Shu

1. College of Artificial Intelligence, Nanjing Agricultural University, Nanjing, China;
2. School of Engineering, College of Science, University of Lincoln, Lincoln, UK

Message from the Editor-in-Chief

Being a top scientist, eager to change the world with your excellent research results, *Journal of Sensors and Actuator Networks (JSAN)* is the platform for you. *JSAN* is an international open access journal that ensures competitive publication times and is moving towards a leading position in the field of sensors and actuators. *JSAN* aims to publish your high-quality research articles and reviews, sharing your best understanding and predictions on sensors and actuators as well as promoting new applications of sensor and actuator based systems. *JSAN* offers and organizes every year Special Issues dedicated to specific areas related to sensing and control, which welcome your contribution and participation.

Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **Thorough Peer-Review**
-  **Coverage by Leading Indexing Services** Scopus, Emerging Sources Citation Index (ESCI - Web of Science), Inspec (IET), DBLP Computer Science Bibliography
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors
-  **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI Institutional Open Access Program (IOAP)

Aims and Scope

JSAN (ISSN 2224-2708) is an open access journal that provides an advanced forum for studies of sensors and actuators. All submitted manuscripts undergo rigorous peer review prior to publication.

The scope of *JSAN* includes:

- System architecture, operating systems, and network hardware for sensor/actuator networks (SAN)
- Smart and intelligent sensing and actuation
- Protocols and middleware for SAN
- Cloud- or edge-based services
- Industry 4.0 and embedded wireless sensor/actuator systems
- Wireless sensor/actuator networks (WSAN) for tactile Internet
- WSAN modelling simulation and virtualization tools and network twins
- Blockchain technologies and their applications to SAN
- Internet-of-Things-based WSAN
- Quality of WSAN services and experiences
- WSAN and next-generation networks (5G, 6G, etc.)
- Applications of WSAN in farming, horticultural, vehicular, and mobile systems; smart cities, manufacturing, health and medical care; environment and wildlife; and others
- WSAN as cyber-physical systems
- WSAN reliability, trust, security, and privacy
- Software-defined WSAN systems and infrastructure
