photonics

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Nelson Tansu

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical / simulations and experimental works – in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **Thorough Peer-Review**
-  **Rapid Rapid Publication** Manuscripts are peer-reviewed and a first decision provided to authors approximately 14.5 days after submission; acceptance to publication is undertaken in 5 days (median values for papers published in this journal in the second half of 2018)
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors
-  **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI Institutional Open Access Program
-  **High Visibility** Indexed in Science Citation Index Expanded (SCIE - Web of Science), INSPEC (IET), Scopus

Aims and Scope

The scope of *Photonics* includes:

- Biophotonics, biomedical optics, and medical optics
- Semiconductor photonics and optoelectronics
- Nanotechnology and nanostructures in optics
- Quantum optics, quantum computing, and applications
- Photonic materials and technology
- Metamaterials, plasmonics, and nanophotonics
- Integrated Optoelectronics and Integrated Optics
- Photonics Device and Technologies
- Optical communications and systems
- Nonlinear and ultrafast optics
- Imaging systems and holography
- Computational photonics and nanostructures
- Photonics for Energy and Green Technologies
- Fundamental & applications of photonics / optics
- Photon-electron-phonon interaction in nanostructures
- Physics and simulation: material properties, device technologies, and integrated systems
