- **No Space Constraints** No restriction on the length of the papers
Aims and Scope

*Medicines* (ISSN 2305-6320) is an international, peer-reviewed, open access journal on conventional, complementary, and integrative medicines. It publishes original research papers, case reports, and systematic reviews. Our aim is to encourage scientists to publish their theoretical and experimental results in as much detail as possible.

The main topics covered include but are not limited to the following:

- History of medicine; medicine, and philosophy
- Proven or evidence-based non-conventional (traditional, alternative, complementary, or integrative) medicines, acupuncture or ethno-medicines, and natural product-based medicines
- Conventional medicine: Both established and emerging treatments
