an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Hiroshi Sakagami

Message from the Editor-in-Chief

Medicines (ISSN 2305-6320) is an international, peer-reviewed, open access monthly journal on drugs and their effect on the body. It publishes original research papers, research communications, letters, and systematic reviews. The contents of the papers handled are conventional, complementary and integrative medicine, and manufacture of new drugs, exploration of drug-delivery systems, diagnosis, therapeutic effect, action mechanism, and their modulation by intrinsic and extrinsic factors. We are expecting your high-quality scientific work in the field of medicine, pharmaceutical science, engineering, and agriculture.

Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **Coverage by Leading Indexing Services** PubMed
-  **Thorough Peer-Review** All submitted manuscripts undergo rigorous peer-review prior to publication
-  **Fast Publication** A first decision is provided to authors approximately 18 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2020)
-  **No Space Constraints** No restriction on the length of the papers

Aims and Scope

Medicines (ISSN 2305-6320) is an international, peer-reviewed, open access journal aimed at combining all areas of medical disciplines and sub-specialties in one platform. It publishes original research papers, case reports, and systematic reviews on all aspects of general medical research and clinical practices, as well as the analysis relevant to human health. Our aim is to encourage scientists to publish their theoretical and experimental results in as much detail as possible. There is no restriction on the length of the papers.

The main subjects covered include but are not limited to the following:

- Cardiovascular diagnosis and therapy
- Therapeutic radiology and oncology
- Infectious diseases
- Aging
- Hormesis
- Anticancer therapies
- Oral Medicine and dentistry
- Emergency and critical care medicine
- Endocrinology and metabolic disorders
- Stem cell investigation and regenerative medicine
- Public health and health economy
- Sports and exercise medicine
- Evidence-based complementary and alternative medicine
- Exploration of new drugs: synthesis, biological activity, and action mechanisms
