future internet

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Dino Giuli

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Future Internet* (ISSN 1999-5903). *Future Internet* is an international, peer-reviewed, open access journal, which provides an advanced forum for scientific studies related to Internet technologies and the information society.

Future Internet is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

We would be pleased to welcome you as one of our authors.

Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **Thorough Peer-Review**
-  **Coverage by Leading Indexing Services** Compendex / Engineering Village (Elsevier), Scopus (Elsevier), Emerging Sources Citation Index (ESCI - Web of Science)
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors
-  **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI Institutional Open Access Program (IOAP)

Aims and Scope

Future Internet (ISSN 1999-5903) publishes regular research papers, reviews and short communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. Therefore, there is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced.

The scope of *Future Internet* includes:

- Internet-related topics, including web and mobile applications
- Information society
- Big data
- Augmented reality
- Smart cities
- Cloud based computing
- The internet of things
- Semantic web, markup, RDF
- Web services
- Virtual and mirror worlds
- e-Government
- e-Education and e-Learning
- Human and social factors
- Quality of experience and living labs
- Any emerging topics
