non-coding **RNA**

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. George A. Calin

Message from the Editor-in-Chief

This field finally has a dedicated journal where its broad community can communicate and exchange its latest findings in one centralized place. This field was built stone by stone from the many scientific contributions from extremely diverse horizons, studying gene silencing in plants, position effect variegation in drosophila or quelling in fungi. This field has achieved maturity, but a lot remains to be discovered! Our aim is to publish manuscripts from all horizons that will have a high impact on the development of the field. Let's have fun and wish *Non-Coding RNA* a long and rewarding life!

Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **Rapid Publication** First decision is provided to authors approximately 17 days after submission; the average time between acceptance to publication is 3 days
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors
-  **High Visibility** Indexed in Emerging Sources Citation Index(ESCI), BIOSIS Previews (Web of Science) and Scopus. Citations available in PubMed, full-text archived in PubMed Central

Aims and Scope

Non-Coding RNA (ISSN 2311-553X) is an open access journal which provides an advanced forum for research studies on non-coding RNAs and their regulatory roles. We encourage the publication of original research papers, short reports, communications, snapshots and conference reports, timely reviews and of commentaries on hot topics of interest to the non-coding RNAs community.

The scope of *Non-Coding RNA* includes, but is not limited to, the following subjects:

- Functional studies dealing with identification, structure-function relationships or biological activity of all types of non-coding RNAs
- Analysis of RNA processing, RNA binding proteins, RNA signaling and RNA interaction pathways
- RNA analyses, bioinformatics, new tools and technologies
- Translational studies involving long and short non-coding RNAs

Non-Coding RNA regularly publishes special issues on relevant and timely topics. Check our website for an updated list of special issues.
