## Message from the Editorial Board

The *International Journal of Molecular Sciences (IJMS)*, ISSN1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **Impact Factor 4.556** (2020 Journal Citation Reports®)
-  **Thorough Peer-Review**
-  **Coverage by Leading Indexing Service** SCIE-Science Citation Index Expanded (Clarivate Analytics), MEDLINE (NLM), PubMed (NLM), Scopus (Elsevier)
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors
-  **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI Institutional Open Access Program

## Aims and Scope

Our aim is to encourage scientists to publish their theoretical and experimental results in as much detail as possible. If there are computational results, the full experimental details must be provided so that the results can be reproduced.

The scope of *IJMS* includes:

- Biochemistry
- Molecular Biology
- Molecular Pathology, Diagnostics, and Therapeutics
- Bioactives and Nutraceuticals
- Molecular Plant Sciences
- Materials Science
- Molecular Toxicology
- Molecular Biophysics
- Molecular Microbiology
- Molecular Oncology
- Molecular Genetics and Genomics
- Molecular Immunology
- Molecular Pharmacology
- Molecular Informatics
- Molecular Endocrinology and Metabolism
- Molecular Neurobiology
- Physical Chemistry and Chemical Physics
- Macromolecules
- Molecular Role of Xenobiotics
