The *International Journal of Molecular Sciences* (*IJMS, ISSN1422-0067*) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Aims and Scope

Our aim is to encourage scientists to publish their theoretical and experimental results in as much detail as possible. If there are computational results, the full experimental details must be provided so that the results can be reproduced.

The scope of *IJMS* includes:

- Biochemistry
- Molecular Biology
- Molecular Pathology, Diagnostics, and Therapeutics
- Bioactives and Nutraceuticals
- Molecular Plant Sciences
- Materials Science
- Molecular Toxicology
- Molecular Biophysics
- Molecular Microbiology
- Molecular Oncology
- Molecular Genetics and Genomics
- Molecular Immunology
- Molecular Pharmacology
- Molecular Informatics
- Molecular Endocrinology and Metabolism
- Molecular Neurobiology
- Physical Chemistry and Chemical Physics
- Macromolecules
- Molecular Role of Xenobiotics
