Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. Water invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.
Aims and Scope

Water (ISSN 2073-4441) is an international and interdisciplinary open-access journal covering all aspects of water, including water science, technology, management and governance. It publishes original research papers, critical reviews and short communications. The scope of Water encompasses the following research areas:

- Climate Change
- Anthropogenic Impacts
- Land Cover Changes
- Water Management and Governance
- Hydrology & Hydrogeology
- Hydraulics & Hydrodynamics
- Water Quality
- Sediment and Contaminant Transfers
- Flood and Drought Events
- Water in the Critical Zone
- Seawater and Coastal Zones
- Wastewater Treatment and Reuse
- Urban Water Management
- Agriculture and Water Cycles
- Water Footprint Assessment
- Water in Relation to Food, Energy & Human Water and One Health
- Water, Biodiversity and Ecosystems
- Water and Socio-Ecosystems
- New Tracers in the Water Cycles
- Remote Sensing and Integrative Modelling
- New Sensors in the Water Cycles
