endocrines

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Antonio Brunetti

Message from the Editor-in-Chief

I am delighted to introduce you to *Endocrines* (ISSN 2673-396X), an international, peer-reviewed, open access journal covering all areas of Endocrinology and Metabolism—from basic and translational science to practical and clinical implications for medical care. As the Editor-in-Chief of this new venture, I can inform you that I am supported by a dedicated Editorial Office and distinguished multidisciplinary Editorial and Reviewer Boards, providing their time and valuable contributions to the progress of *Endocrines* and its essential topics. Thanks to the full open access policy, all the articles published in *Endocrines* will gain high visibility and rapid dissemination, expeditiously capturing the attention of the international endocrine and metabolic community. Having founded a unique platform to communicate and discuss with endocrinologists and endocrine researchers throughout the world, without length restraints or publication delay, we are pleased to welcome you as one of our authors!

Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **Thorough Peer-Review**
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors
-  **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI Institutional Open Access Program

Aims and Scope

Endocrines (ISSN 2673-396X) is an international, peer-reviewed, open access journal that provides an advanced forum for studies related to endocrinology. It publishes reviews, research articles, communications, and technical notes. There is no restriction on the length of the papers, and we encourage scientists to publish their results in as much detail as possible.

Endocrines covers all topics related to endocrinology, including but not limited to the following:

Genetic, epigenetic, biochemical, and molecular aspects of endocrine research and cell regulation in mammalian systems

Endocrine physiology

Endocrine pathology and diagnostics

Clinical aspects of endocrinology

Thyroid

Diabetes, obesity, and metabolism

Parathyroid, bone, and mineral metabolism

Adrenal gland and steroids

Pituitary gland, hypothalamus, and neuro-immune–endocrine interactions

Reproduction and pregnancy

Developmental endocrinology

Pediatric endocrinology and inborn errors of metabolism

Endocrine hypertension and cardiovascular endocrinology

etc
