Figure S1. The mass spectrum of spot 187, 188, 208 and 548 in 2-DE gel map of the wild-type yeast strain BY4741.
Figure S2. Enzyme specific activity of three identified down-regulated glycolytic metabolism enzymes in pep4Δ strain comparing with the BY4741 (WT). The data represent means ± S.D. (n = 3). * \( p < 0.05 \), ** \( p < 0.01 \) compared to BY4741.
