**Supplementary Materials**

**Figure S1.** The effect of compounds 2-4 and 6 on cell viability of RAW 264.7 macrophages. Cells were treated with LPS (1 μg/mL) in presence or absence of test compounds (10 and 20 μM). Cell viability was determined by MTT assay. The values are expressed as the means ± S.D. of three experiments. *p < 0.05 (vs. vehicle control).
