B. PRE-TEST / NUTRITION EDUCATION QUESTIONS SESSION #1

1. Which of the following statements describe you?
   a. I have trouble knowing what I should eat
   b. I feel my diet meets my nutritional needs
   c. I try to follow a diet I believe will improve my performance
   d. I feel pressure from others to follow a particular diet

2. Increasing muscle mass is essential to sport performance.
   a. Strongly agree
   b. Agree
3. How do you rate the importance of what you eat in exercise performance?
   a. Very important
   b. Important
   c. Of some importance
   d. Of no importance
4. How do you rate the importance of what you drink in exercise performance?
   a. Very important
   b. Important
   c. Of some importance
   d. Of no importance
5. In the past week, how often did you eat breakfast?
   a. Everyday
   b. 3-5 days per week
   c. 2 days or less per week
   d. Never
6. In the past week, what type of lunch did you eat most days?
   a. Packed lunch from home
   b. I brought lunch outside of school
   c. School lunch
   d. I didn’t have lunch at all
7. In the past week, what type of dinner did you eat most days?
   a. Homemade meal
   b. Take-out or Fast Food
   c. Meal at a Restaurant
   d. I didn’t have dinner
8. Do you snack between meals?
   a. Yes
   b. No
9. Which of the following fluids do you usually drink during exercise?
   a. Water
   b. Soft drinks
   c. Fruit juice
   d. Sports drinks
10. How soon before exercise do you eat?
    a. Within 1 hour before
    b. Between 1-2 hours before
    c. Between 2-3 hours before
    d. More than 3 hours before
11. How soon after exercise do you first eat?
    a. Within ½ an hour after
    b. Between ½-1 hour after
    c. Between 1-2 hours after
    d. More than 2 hours after
12. Which group of foods do you make sure to eat before exercise?
    a. Carbohydrates (i.e. bread, pasta, potatoes)
    b. Protein (i.e. meat peanut butter, eggs, fish)
    c. Fruit and vegetables
    d. Dairy (i.e. yogurt and milk)
13. Which group of foods do you make sure to eat after exercise?
    a. Carbohydrates (i.e. bread, pasta, potatoes)
b. Protein (i.e. meat peanut butter, eggs, fish)
c. Fruit and vegetables
d. Dairy (i.e. yogurt and milk)

14. I think supplements are necessary to support my exercise training program.
   a. True
   b. False
   c. I don’t know

15. Most people can’t get all of the minerals they need from food, so supplements are needed.
   a. True
   b. False
   c. I don’t know

16. You can trust all claims made about supplements, i.e. “This rapidly builds muscle.”
   a. True
   b. False
   c. I don’t know

17. Our bodies create Vitamin D from direct sunlight on our skin when we are outdoors.
   a. True
   b. False
   c. I don’t know

18. The iron in meat is more easily absorbed than iron found in vegetables.
   a. True
   b. False
   c. I don’t know

   a. True
   b. False
   c. I don’t know

20. Supplements can be a substitute for an athletes’ meals.
   a. True
   b. False
   c. I don’t know

21. It is better to get vitamins and minerals from supplements than from food.
   a. True
   b. False
   c. I don’t know

22. During exercise longer than 1 hour, sport drinks are better than water (i.e. Gatorade).
   a. True
   b. False
   c. I don’t know

23. You only need to drink when you are thirsty.
   a. True
   b. False
   c. I don’t know

24. Dehydration can reduce exercise performance.
   a. True
   b. False
   c. I don’t know

25. Fluids are needed before, during and after a competition or exercise.
   a. True
   b. False
   c. I don’t know

26. During exercise, you should keep an ice cube in your mouth to drink.
27. Sports drinks and energy drinks are the same thing.
   a. True
   b. False
   c. I don’t know

   a. True
   b. False
   c. I don’t know

29. After training or exercise,
   a. Wait 2-3 hours before eating to allow time to recover
   b. Eat immediately to start refueling
   c. I don’t know

30. You shouldn’t eat carbohydrate (i.e. bread, pasta) after 5p or you will gain weight
   a. True
   b. False
   c. I don’t know

31. It is necessary to reduce pasta, potato and bread intake during periods of intense exercise
   a. True
   b. False
   c. I don’t know

32. It is recommended that an athlete eat a meal rich in carbohydrates 1-2 hours after exercise.
   a. True
   b. False
   c. I don’t know

PRE-TEST / NUTRITION EDUCATION SESSION #2

1. The carbohydrate content of ham is:
   a. High
   b. Low or absent
   c. I don’t know

2. The carbohydrate content of white bread is:
   a. High
   b. Low or absent
   c. I don’t know

3. The carbohydrate content of a tomato is:
   a. High
   b. Low or absent
   c. I don’t know

4. The fiber content of honey is:
   a. High
   b. Low or absent
   c. I don’t know

5. Wheat bread is richer in fiber than white bread:
   a. True
   b. False
   c. I don’t know

6. Bran is the outer part of the grain kernel. This is very high in fiber.
   a. True
   b. False
7. The glycemic index of a food:
   a. Indicated the carbohydrate content of a food
   b. Classifies foods based on the blood glucose effect
   c. Indicates blood glucose rise as a result of protein intake
   d. Shows the calorie density of a food

8. Which of the following food choices are good food choices before and after exercise?
   a. Sausage and Chips
   b. Chicken with Pasta and Tomato Sauce

9. You should get most of your energy from carbohydrates when you exercise frequently.
   a. True
   b. False
   c. I don’t know

10. Carbohydrate consumption is not good for an athlete
    a. True
    b. False
    c. I don’t know

11. The protein content of chicken is
    a. High
    b. Low or absent
    c. I don’t know

12. The protein content of a pear is:
    a. High
    b. Low or absent
    c. I don’t know

13. The protein content of Parmesan cheese is:
    a. High
    b. Low or absent
    c. I don’t know

14. Muscles get most of their energy for exercise from protein
    a. True
    b. False
    c. I don’t know

15. If you eat more protein than you need, it is likely to be stored as fat.
    a. True
    b. False
    c. I don’t know

16. Meat and eggs contain protein, while other foods do not. These are staple foods for exercise.
    a. True
    b. False
    c. I don’t know

17. The more protein you eat, the more muscle you build.
    a. True
    b. False
    c. I don’t know

18. Athletes practicing extensive training have double the protein needs of the general population
    a. True
    b. False
    c. I don’t know

19. Excessive dietary protein intake can lead to liver and kidney damage.
    a. True
b. False

c. I don’t know

POST-TEST (SESSION #3)

1. In the past week, how often did you eat breakfast?
   a. Everyday
   b. 3-5 days per week
   c. 2 days or less per week
   d. Never

2. In the past week, what type of lunch did you eat most days?
   a. Packed lunch from home
   b. I bought lunch outside of school
   c. School lunch
   d. I didn’t have lunch at all

3. In the past week, what type of dinner did you eat most days?
   a. Homemade Meal
   b. Take-out or Fast Food
   c. Meal at a Restaurant
   d. I didn’t have Dinner

4. Do you snack between meals?
   a. Yes
   b. No

5. Which of the following fluids do you usually drink during exercise?
   a. Water
   b. Soft Drinks
   c. Fruit Juice
   d. Sports Drinks

6. How soon before exercise do you eat?
   a. Within 1 hour before
   b. Between 1-2 hours before
   c. Between 2-3 hours before
   d. More than 3 hours before

7. How soon after exercise do you first eat?
   a. Within 1/2 an hour after
   b. Between 1/2 - 1 hour after
   c. Between 1 - 2 hours after
   d. More than 2 hours after

8. Which group of foods do you make sure to eat before exercise?
   a. Carbohydrates (i.e. bread, pasta, potatoes)
   b. Protein (i.e. meat, peanut butter, eggs, fish)
   c. Fruit and Vegetables
   d. Dairy (i.e. yogurt and milk)

9. Which group of foods do you make sure to eat after exercise?
   a. Carbohydrates (i.e. bread, pasta, potatoes)
   b. Protein (i.e. meat, peanut butter, eggs, fish)
   c. Fruit and Vegetables
   d. Dairy (i.e. yogurt, milk)

10. If someone fails to meet their protein needs with food, amino acids are necessary.
    a. True
    b. False
    c. I don’t know

11. Dietary supplements are necessary, both in competitive sport and non-competitive.
12. It is better to get vitamins and minerals from supplements than from food.
   a. True
   b. False
   c. I don’t know

13. Have you ever seen this image? (Food before Supplement)
   a. Yes
   b. No

14. Low calcium and low vitamin D intake are associated with an increased fracture risk.
   a. True
   b. False
   c. I don’t know

15. Our body creates Vitamin D from direct sunlight on our skin when we are outdoors.
   a. True
   b. False
   c. I don’t know

16. Most people will never be able to meet their iron needs with food, so a supplement is required.
   a. True
   b. False
   c. I don’t know

17. Pork and poultry are good sources of iron.
   a. True
   b. False
   c. I don’t know

18. Have you ever seen this image? (Ca, Vit D, Iron)
   a. Yes
   b. No

19. Canned beans are saltier than dried beans.
   a. True
   b. False
   c. I don’t know

   a. True
   b. False
   c. I don’t know

21. Have you ever seen this image? (Electrolytes)
   a. Yes
   b. No

22. Sports drinks are the most appropriate to drink after two hours of exercise.
   a. True
   b. False
   c. I don’t know

23. The best advice for athletes is to drink when they are thirsty.
   a. True
   b. False
   c. I don’t know

24. Important support for the performance of an athlete is water.
   a. True
   b. False
25. Coaches must not allow drinking fluids during an exercise session.
   a. True
   b. False
   c. I don’t know

26. Sports drinks and energy drinks are the same thing.
   a. True
   b. False
   c. I don’t know

27. Have you ever seen this image? (Hydration)
   a. Yes
   b. No

28. At the end of a training session, an athlete must have a meal.
   a. True
   b. False
   c. I don’t know

29. Which of the following food choices is a good choice before and after exercise?
   a. Ham Sandwich with Fruit
   b. Steak and Salad

30. Consuming carbohydrates after 5pm can enhance exercise performance.
   a. True
   b. False
   c. I don’t know

31. It is necessary to increase pasta, potato and bread intake during periods of intense exercise.
   a. True
   b. False
   c. I don’t know

32. It is recommended that an athlete eat a meal rich in carbohydrates 1-2 hours after exercise.
   a. True
   b. False
   c. I don’t know

33. You should get most of your calories from carbohydrates (i.e. bread, pasta, potato).
   a. True
   b. False
   c. I don’t know

34. The carbohydrate content of an apple is:
   a. High
   b. Low or absent
   c. I don’t know

35. The carbohydrate content of cheddar cheese is:
   a. High
   b. Low or absent
   c. I don’t know

36. The carbohydrate content of breakfast cereal is:
   a. High
   b. Low or absent
   c. I don’t know

37. The fiber content of chicken breast is:
   a. High
   b. Low or absent
   c. I don’t know

38. Wheat pasta is richer in fiber than white pasta.
39. Bran is the outer part of the grain kernel that is very high in fiber.
   a. True
   b. False
   c. I don’t know

40. The glycemic index of food:
   a. Indicated blood glucose rise as a result of protein intake
   b. Indicates the carbohydrate content of a food
   c. Shows the calorie density of a food
   d. Classifies foods based on the blood glucose effect

41. Carbohydrate consumption is not good for an athlete.
   a. True
   b. False
   c. I don’t know

42. The protein content of codfish is:
   a. High
   b. Low or absent
   c. I don’t know

43. The protein content of chocolate is:
   a. High
   b. Low or absent
   c. I don’t know

44. The protein content of rice is:
   a. High
   b. Low or absent
   c. I don’t know

45. Muscles get most of their energy for exercise from protein.
   a. True
   b. False
   c. I don’t know

46. If you eat more protein than you need, it is likely to be stored as fat.
   a. True
   b. False
   c. I don’t know

47. All you have to do to make muscles bigger is eat more protein.
   a. True
   b. False
   c. I don’t know

48. Excessive dietary protein intake can lead to liver and kidney damage.
   a. True
   b. False
   c. I don’t know

49. Athletes practicing extensive training have double the protein needs of the general population.
   a. True
   b. False
   c. I don’t know

50. Chicken contains protein, while other foods do not. This is a staple food for exercise.
   a. True
   b. False
c. I don’t know

51. Do you follow @FuelTheHerd on Twitter or Instagram?
   a. Yes
   b. No
