(a) Hot flushes / Premenopausal

(b) Hot flushes / Perimenopausal

(c) Hot flushes / Postmenopausal

Figure S1. Subgroup analysis of the estimated number of hot flushes per week (times/week). Error bars represent standard errors. # represents $p < 0.05$ between groups. Numbers for Weeks 1, 2, 3, and 4 were estimated by the Poisson regression model with adjustment of Week 0 number. Participants with missing values were excluded. CGA, chlorogenic acid.
