## Synthesis of PEGylated squalene

PEGylated squalene was synthesized in four steps as reported in previous papers [1-3]. Briefly, squalene was functionalized to 1,1',2-tris-nor-squalene aldehyde in three steps. In the first step 2-hydroxy-3-bromosqualene was synthesized from squalene with *N*-bromosuccinimide in tetrahydrofuran at 0 °C for 90 minutes, then, 2,3-oxidosqualene was obtained from 2-hydroxy-3-bromosqualene with potassium carbonate in methanol at room temperature (25 °C) for 2 hours. In the third step, 1,1',2-tris-nor-squalene aldehyde was obtained by reducing the epoxide with periodic acid in water-dioxane solution at room temperature (25 °C) for 2 hours. In the last step, PEGylated squalene was synthesized by mixing 1,1',2-tris-nor-squalene aldehyde (0.206 g, 0.54 mmol, 1 equiv.) with poly-(ethyleneglycol)-bis(3-aminopropyl) (1500 Da) (0.886 g, 0.59 mmol, 1.1 equiv.) in acetonitrile (20 mL) and magnetically stirred for 24h at room temperature (25 °C), under nitrogen atmosphere. The product was obtained in quantitative yield and used further without purification. PEGylated squalene was stored as solution in acetonitrile at 2-4 °C for further experiments. <sup>1</sup>H-NMR (400 MHz, CDCl<sub>3</sub>, TMS) δ (ppm) = 7.64 (1H, t, J=4.8, CH=N), 5.15 - 5.08 (5H, m, CH=C), 3.70 - 3.64 (14H, m, CH<sub>2</sub>-CH<sub>2</sub>-O), 3.19 (2H, t, J=6.4, CH<sub>2</sub>-NH<sub>2</sub>), 2.53 - 2.49 (2H, m, CH<sub>2</sub>), 2.33 - 2.30 (2H, m, CH<sub>2</sub>), 2.09 - 1.97 (16H, m, CH<sub>2</sub>-CH<sub>2</sub>), 1.88 - 1.83 (3H, m, CH<sub>3</sub>), 1.68 (3H, m, =C(CH<sub>3</sub>)-CH<sub>3</sub>), 1.61 (12H, m, =C(CH<sub>3</sub>)) (Fig 7.S). <sup>13</sup>C-NMR (101 MHz, CDCl<sub>3</sub>, TMS) δ (ppm) = 161.67 (C=N), 134.91 (CH<sub>3</sub>-C=C), 131.25 (C(CH<sub>3</sub>)<sub>2</sub>), 124.40 (CH<sub>2</sub>-C=CH), 124.26 (CH<sub>2</sub>-C=C), 72.57 (OCH<sub>2</sub>-CH<sub>2</sub>), 70.58 (O-CH<sub>2</sub>-CH<sub>2</sub>-O), 70.35 (O-CH<sub>2</sub>), 70.12 (O-CH<sub>2</sub>), 69.97 (O-CH<sub>2</sub>), 61.71 (NCH<sub>2</sub>), 39.73 (CH<sub>2</sub>-CH<sub>2</sub>), 39.58 (CH<sub>2</sub>-NH<sub>2</sub>), 31.85 (CH<sub>2</sub>), 28.25 (CH<sub>2</sub>), 26.77 (CH<sub>2</sub>), 26.66 (CH<sub>2</sub>), 26.55 (CH<sub>2</sub>), 25.71 (CH<sub>2</sub>), 17.69 (CH<sub>3</sub>), 16.06 (CH<sub>3</sub>), 16.01 (CH<sub>3</sub>).
