Study 2—Text Validation

Twenty-six participants were recruited via Amazon’s Mechanical Turk online crowdsourcing platform. All participants were adults living in India.

They received the following instructions:

In this task, you will be asked to read through two texts, asking you to take environmental action. For each text, we would like you to answer two questions:

1) To what degree the text reminds you about purity and cleanliness

2) To what degree the text reminds you about nature and all living beings

Text 1

"2nd October is the birth anniversary of our Pujya Mahatma Gandhi and Lal Bahadur Shashtri ji. Lal Bahadur Shastri gave us the Mantra of Jai Jawan Jai Kisan. Indian Farmers filled the granaries in reply to that exhortation. Pujya Bapu gave us the message of ‘Quit India- Clean India’. Our countrymen, under the leadership of Mahatma Gandhi, freed the nation from colonialism. Bapu’s dream of cleanliness, however, remains unfulfilled.

I invite every one of you. We are going to take an oath here. My request is that you should raise both of your hands and remember Mahatma Gandhi. Feel that this work is for building a Bharat of the dreams of Pujya Bapu. We should not just utter the words but take solemn pledge. You will take the pledge, take the movement forward and will leave no stone unturned. Mahatma Gandhi dreamt of an India which was not only free but also clean and developed. Mahatma Gandhi secured freedom for Mother India. Now it is our duty to serve Mother India by keeping the country neat and clean."

Text 2

"We as human beings are very much dependent on others in nature. For example, we depend on the trees; we depend on the ants, the mice and the birds. Without birds the forests will not survive, because the birds whelp in transporting seeds. Without snakes the mice will feed on everything. Without frogs the bugs will thrive. Without forests there will be no rains. Without rains we will all die. There is really no end to our dependency on each other."
Eventually, once we get rid of our delusions and make progress towards learning about our environment, we then realize that we do not the masters in running the show. Everything in the universe runs the show—the animal, the wind, the trees, etc. Therefore, there is a lesson for all of us in this: we must respect not only each other but also everyone and everything in this world. This country is going to be run by your initiatives and by your helping each other. We have to help our neighbors and clean our environments."
