Section Introduction

The “Applied Physics” Section of Applied Sciences is now accepting high quality original research and review articles related to all aspects of physics applications aiming to solve practical problems. This section is a multidisciplinary platform and its scope is relatively wide. Every article employing physics or presenting physics research focused on (i) developing new methods and/or technologies, or (ii) solving engineering problems is welcome in the “Applied Physics” Section of Applied Sciences. This includes research with applications in the following areas: astrophysics, atmosphere, biophysics, cardiology, complex systems, disaster mitigation, earthquakes, geophysics, lasers, materials, medicine, optics, photonics, plasmas, reliability, safety, security, semiconductors, and spectroscopy. All manuscripts submitted for publication in this section will undergo a thorough peer review process and will be published rapidly online upon acceptance.
