

## Section **Quantum Science and Technology**

### Section Editorial Board

**Prof. Dr. Nicolas Gisin**  
**Dr. Philippe Chomaz**  
**Prof. Dr. Lorenzo Colace**  
**Dr. Fabrizio Dolcini**  
**Dr. Leonardo Fallani**  
**Prof. Dr. Marco Genovese**  
**Dr. Tomoyuki Horikiri**  
**Prof. Dr. Dong-Hyun Kim**  
**Dr. Serghei Klimin**  
**Prof. Dr. Nikos Konofaos**  
**Prof. Dr. Yongmin Li**  
**Dr. Rosario Lo Franco**  
**Prof. Dr. Dmitri Mogilevtsev**  
**Dr. Georgios M. Nikolopoulos**  
**Prof. Dr. Masanao Ozawa**  
**Prof. Dr. Emmanuel Paspalakis**  
**Dr. David Petrosyan**  
**Prof. Dr. Mario Piattini**  
**Dr. Dario Poletti**  
**Dr. Carlo Sias**  
**Prof. Dr. Gregory Slepyan**  
**Dr. Sérgio F. Sousa**  
**Prof. Dr. Dieter Suter**  
**Prof. Dr. Diego Trancanelli**

### Section Information

Quantum science and technology is a vibrant and multidisciplinary field of research at the interface of physics, mathematics, computer science and material science. Section “Quantum Science and Technology” is dedicated to bringing together the latest and most important results and perspectives from across the emerging field of quantum science and technology.

In addition to publishing research articles that report urgent breakthrough results of significant importance to the field of quantum science and technology, this section will also publish invited reviews on themes of particular current interest to the community.

### Subject Areas

- Quantum cryptography;
- Quantum metrology;
- Quantum sensing;
- Quantum communication;
- Quantum biology;
- Quantum materials;
- Quantum control;
- Quantum thermodynamics;
- Quantum software, algorithms and code.
