Section Information

The International Journal of Environmental Research and Public Health (IJERPH) is a peer-reviewed scientific journal that publishes articles and communications in the interdisciplinary area of environmental health sciences and public health. The subsection of global health will focus on public health and the environment in a global perspective, with emphasis on reproductive health and the environment, including the importance of nutrition as an important interactor with exposure to contaminants. The relation between fetal health in utero and chronic diseases later in life in the context of socio-economic development, education and nutrition is an important topic. Epidemiologic studies, as well as more basic scientific studies, are welcome, with a global focus and relevance. Such an example is maternal mortality, which is still high globally, and reducing it is a top priority. Teenage reproductive health will have an increased focus, especially for low- and middle-income countries. Global public health for the next generation is a very important issue that aims to prevent disease, prolong life, and promote physical, mental, and social well-being.

Keywords: Prevention and control of infectious and communicable diseases; Teenage reproductive health in low- and middle-income countries; Environmental impacts on pregnancy, pregnancy outcome, and early child development; Nutrition and contaminants; Global burden of diseases in an environmental perspective; Chronic diseases in a global perspective; Poverty, sanitation and hygiene; Food safety and food policy; The promotion of mental well-being, the prevention of mental disorders; Public strategies to improve the health of vulnerable groups; Health inequity and perceptions of health; human rights, particularly in relation to health and population issues in developing countries.

Content Highlights

Emerging Adults and COVID-19: The Role of Individualism-Collectivism on Perceived Risks and Psychological Maladjustment
Authors: Alessandro Germani, Livia Buratta, Elisa Delvecchio and Claudia Mazzeschi
Int. J. Environ. Res. Public Health 2020, 17(10), 3497
https://doi.org/10.3390/ijerph17103497

Sedentary Behaviors and Physical Activity of Italian Undergraduate Students during Lockdown at the Time of CoViD−19 Pandemic
Authors: Francesca Gallè, Elita Anna Sabelia, Stefano Ferracuti, Osvalda De Giglio, Giuseppina Caggiano, Carmela Protano, Federica Valerani, Eduardo Alfonso Parisi, Giuliana Valerio, Giorgio Liguori, Maria Teresa Montagna, Vincenzo Romano Spica, Giovanna Da Molin, Giovanni Battista Orsi and Christian Napoli
Int. J. Environ. Res. Public Health 2020, 17(17), 6171
https://doi.org/10.3390/ijerph17176171

Impact of the Burden of COVID-19 in Italy: Results of Disability-Adjusted Life Years (DALYs) and Productivity Loss
Authors: Mario Cesare Nurchis, Domenico Pascucci, Martina Sapienza, Leonardo Villani, Fioriana D’Ambrosio, Francesco Castrini, Maria Lucia Spechizia, Patrizia Laurenti and Gianfranco Damiani
Int. J. Environ. Res. Public Health 2020, 17(12), 4233
https://doi.org/10.3390/ijerph17124233

Authors: Antimo Moretti, Fabrizio Menna, Milena Aulicino, Marco Paolotta, Sara Liguori and Giovanni Iolascon
Int. J. Environ. Res. Public Health 2020, 17(17), 6284
https://doi.org/10.3390/ijerph17176284

The Influence of Bullying and Cyberbullying in the Psychological Adjustment of Victims and Aggressors in Adolescence
Authors: Estefanía Estévez, Jesús F. Estévez, Lucía Segura and Cristian Suárez
Int. J. Environ. Res. Public Health 2019, 16(12), 2080
