Section Introduction

Earth Sciences and Geography, a section of Applied Sciences (ISSN 2076-3417), provides a broad forum for publication on all aspects of applied Earth Sciences and Geography research. It publishes reviews, research papers and communications focusing on applied study of the earth including earth observation. We particularly welcome publications submitted to special issues focused on applied research in geology, hydrological and hydrogeological sciences, structural and tectonic related volcanism and geo-hazards, land and water remote sensing, earth observational systems., coastal geology, sediments and geomorphology, biogeochemistry and biosphere / geosphere interactions, climate change impact, environmental contamination, geophysics and environmental geo-technics, big data analysis / visualization and modelling, geothermal energy, isotope biogeochemistry, and a range of other topics. Our aim is to encourage scientists to publish their experiment and theoretical results from Earth Science and Geography within this section of Applied Sciences.

Author Benefits

- **Impact Factor 2.474** (2019 Journal Citation Reports) 5-Year Impact Factor 2.458
- **CiteScore (Scopus)** 2.40
- Coverage byLeading Indexing Services: SCIE-Science Citation Index Expanded (Clarivate Analytics, formerly Thomson Reuters), INSPEC (IET), Scopus (Elsevier)
- Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 14 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the first half of 2020).
