Section Information

The Aging section aims to provide a platform for authors, reviewers, and researchers around the world to present their original articles, qualitative studies, commentaries, and systematic reviews concerning the new developments in active and healthy aging. The Aging section includes a wide range of specialties and focus areas, such as active and healthy aging; quality of life; nutrition and exercise; mental health; age-friendly health system; aging processes, lifestyles and longevity; health and wellbeing; e-health for active aging; social technology in the lives of older people; health inequalities in ageing societies and movement disorders and falls in older persons etc. Interdisciplinary approaches are encouraged. All manuscripts submitted for publication in this section will undergo a rigorous peer review process and will be shortly published online upon acceptance.
