

Academic Open Access Publishing
since 1996

Institutional Open Access Program

Our Institutional Open Access Program

Our Institutional Open Access Program (IOAP) is designed to help institutions to manage the transition to the Open Access publishing model. Researchers affiliated with participating universities benefit from a 10% discount on the Article Processing Charges (APC) for any paper published in an MDPI journal, while the institution incurs no fee for participating in the program.

Simplification

There is no complex contract or hidden terms and conditions. The institution can cancel its participation in the program at any time. To support the simplification of payment processes, we can also adjust our invoicing procedure to meet the needs of each institution.

Transparency and Control

All institutional participants receive free access to our online submission system, which provides a wide range of metadata on articles under processing and articles published by associated authors since 2010.

Cost Reduction

Associated authors receive a 10% discount on the APC for accepted articles and on the Book Processing Charges (BPC) for MDPI Books. In addition, the reduced administrative efforts from our invoicing and access account process can help institutions to save time and effort.

For more information, visit: www.mdpi.com/about/ioap

For any queries, please contact: ioap@mdpi.com

The IOAP Features

No fee

The program is free and will remain free for as long as you continue participating. You may withdraw from the program at any time.

10% discount on the APC

Authors affiliated with the institution will receive a 10% discount on the APC and BPC for all papers published in an MDPI journal.

No obligation

The institution is not obligated to submit any number of manuscripts to MDPI journals as part of the IOAP.

Auto-archiving into your institutional repository

We offer automated deposits of papers from affiliated authors to your institutional repository as long as it supports software SWORD 1.3.

Access to the MDPI submission system

The institution is granted free access to the MDPI online submission system and can receive free alerts of new submissions to our journals.

Billing options of Non-central or Central

By default, authors from the institution will continue to be invoiced directly (non-central billing) unless the institution opts for central billing.

About MDPI

MDPI is a publisher of fully peer-reviewed, Open Access journals with a focus on thorough and rapid editorial processing. Our aim is to ensure that high-quality research is verified and made available to the research community as quickly as possible. MDPI stands at the forefront of the Open Access movement, having launched its first online journal *Molecules* in 1996. Today, MDPI is a leader in Open Access publishing with over 200 journals across all research disciplines, and all content published under a Creative Commons Attribution License (CC BY).

In addition, we offer the following multidisciplinary services to disseminate open access research:

Sciforum is a platform for academic communication and collaboration where scholars can search, set up or participate in scientific conferences and discussion groups.

► sciforum.net

Preprints

Preprints is a multidisciplinary not-for-profit platform for rapid communication of research results before peer-review.

► preprints.org

JAMS is a complete manuscript submission system that incorporates all steps from initial submission to publication, including peer-review and invoicing. We also offer flexible administrative and production support to publishers and editors.
