

MMCS2024 Harnessing the Power of New Drug Modalities

List of Posters

Number	Author	Title
1	Claudio Viegas Jr.	PQM-214: A New Curcumin-Based N-Acylhydrazone Ligand Inhibits Cell Proliferation and Induces Apoptosis and Senescence in Adenocarcinoma Cells
2	Emanuela Martino	Secondary Metabolites From Genus Cladonia Lichens as Weapons Against Cholangiocarcinoma
3	Chiao-Wen Lin	Alisol A Exerts Anti-proliferative Activity Against Human Oral Cancer Cells Through Triggering JNK/p38 MAPK-Mediated Apoptotic Cascade
4	Shun-Fa Yang	Apoptotic Effect and Cell Arrest of L48H37 in Human Oral Cancer Cells Through JNK/p38 Signaling
5	Daniela Rossi	Recent Advances in Anticancer Therapy: Identification of New Allosteric Modulators of FGF/FGFR System
6	Michał Sulik	Mitochondria-Targeting Triphenylphosphonium Salts of Monensin – Synthesis and Antiproliferative Activity
7	Ainoa Sanchez Arfelis	Is It Possible to Degrade C-Myc With Low Affinity Compound-Based PROTACs?
8	Melania Elettra Vaccari	Sigma Receptor Modulators for Fighting Cancer or Neuropathic Pain: Activity Switches by Small Structural Changes
9	Danuta Drozdowska	Trimethoprim Derivatives With Potential Anticancer Properties
10	Christian Griñán-Ferré	Virtual Screening and in vitro and in vivo Analyses Revealed Novel Potent Methyltransferase G9a Inhibitors for Neurodegenerative diseases
11	Swagat Mohanty	Ethnopharmacological Validation of Antiproliferative and Anti-inflammatory Activities of Four Curcuma Species Through Chemical Characterization and In-Vitro Studies
12	Veronika Karadjova	Synthesis, Characterization and Anticancer Activity of Cu(II)-Peptide Complexes
13	Stanislava Vladimirova	New Pyrrole Derivatives as Promising Biological Agents
14	Martina Garbagnoli	Targeting RNA Through RNA-Binding Proteins: Synthesis of HuR Ligands and Evaluation of Their Ability to Interfere With the HuR-mRNA Complex via STD NMR
15	Celia Escriche	Overcoming Pain Management: Unlocking the Power of Dual-Mechanism Compounds
16	Roberta Listro	Novel Therapeutic Approaches in Fighting Antimicrobial Resistance: Targeting LsrK in Bacterial Quorum Sensing
17	Miglena Milusheva	Design, Synthesis, and Biological Evaluation of New Hybrid Molecules as Anticoagulants
18	Kirila Stoyanova	Synthesis and Spasmolytic Activity of 2-Amino-N-(3-Chlorophenethyl)Benzamide and Its Metal Complexes
19	Alba López Ruiz	N-Substituted Piperidines in Benzohomoadamantane-Based Ureas: Potent Inhibitors of Soluble Epoxide Hydrolase With Anti-inflammatory Activity
20	Noemi Martinez-Conde	Targeting TDP-43 Against Alzheimer's Disease: Discovery of Ligands and Aggregation Inhibitors

21	Antonio Andújar-Arias	Discovery and Optimization of a Novel Class of Positive Allosteric Modulators for the Cannabinoid 2 Receptor
22	Alessio Colleoni	Towards the Identification of Novel Usnic Acid Derivatives for the Treatment of Fungal Infections
23	Siriwat Hongnak	Exploring Structure-Activity Relationships on New Diphenethylamines Interacting With the Kappa-Opioid Receptor
24	Kinga Czarnota-Łydka	Triazine-Based Small Molecules as Novel 5-HT ₆ /FAAH Modulators
25	Carmen Escolano	From Bicyclic α -Iminophosphonates to New Imidazoline I ₂ Receptor Ligands
26	Salomé Llabrés	Unveiling the Factors That Modulate the Sterol Selectivity of the N-Terminal Domain of NPC1L1
27	Maria Emília Sousa	Synthesis of Marine-Inspired Cyclopeptide Derivatives to Overcome Multidrug Resistance
28	Aldrick Verano	Novel Tetrahydrobenzo[<i>h</i>][1,6]Naphthyridine-Derived Inhibitors of Amyloid Aggregation
29	Priscila P. Dario	Knoevengael Adducts From Hydroxychloroquine and 7-Chloro-4-Aminoquinoline: In Vitro Antiprotozoal Activity Against <i>L. Amazonensis</i> Promastigote Form
30	Viktor Filatov	In Silico and in Vitro Research of a Novel Combination for the Targeted Modulation of 5 α -Reductase in Skin Sebocytes Under Androgen-Induced Stress
31	Abhay Tripathi	Computational Modeling of Overexpressed Glycoprotein as a Drug Target Integrated Into Nano-Targeted Drug Delivery in the Evaluation of Anticancer Activity
32	Pooja Sharma	Repurposing Drugs as 30s Translation Protein Inhibitors to Overcome MDR-Resistant Bacterial Strains: Computational and in Vitro Approach
33	Teodora Bavaro	β -Mannosides in Medicinal Chemistry. Synthesis by Transglycosylation Reaction Using Immobilized β -Mannosidase From <i>Cellulomonas Fimi</i>
34	Sahar Behzad	A Survey of Protective Effect of Melatonin Against Trifluoperazine-Induced Genotoxicity in Peripheral Blood Lymphocytes via Micronucleus Assay
35	Ramona Santini	Discotic Amphiphile Supramolecular Polymers for Drug Release and Cellular Activation With Light
36	Christian Bergeest	Unveiling the Challenges of Covalent Docking: A Computational Analysis on SARS-CoV-2 MPro Inhibitors
37	Massimo Serra	Synthesis of Mannosylated Fullerene as Adjuvant Carrier for the Development of Innovative Nanovaccines
38	Urooj Haroon	A Facile Preparation, in Silico Molecular Docking, and Evaluation of Antibacterial and Anti-inflammatory Activities of Enoxacin Schiff Bases
39	Sami Ud Din	Investigation of Molecular Imaging Potential of Metastable Technetium-99 Labelled Levofloxacin
