an Open Access Journal by MDPI

Editor-in-Chief

Dr. Igor Medintz

Message from the Editor-in-Chief

Chemosensors continues to grow as a forum for all manners of sensing that encompass chemistry. *Chemosensors* is published in open access format – all articles and content are released on the internet immediately following acceptance, thus allowing unlimited access to the content as soon as it is published. We would be happy to have you join our growing list of authors.

Author Benefits

-  **Rapid and Thorough Peer-Review**
-  **Open Access** Unlimited and free access for readers
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI Institutional Open Access Program
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors
-  **High Visibility** Indexed in Scopus, Emerging Sources Citation Index (ESCI-Web of Science), Chemical Abstracts (ACS) and in Inspec (IET)

Aims and Scope

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. All aspects of chemosensing are welcomed, from theoretical concepts to education and training. The journal publishes reviews, regular research papers, and communications.

The scope of *Chemosensors* includes:

New chemical sensors design

Electrochemical devices, potentiometric sensor, redox electrode

pH sensors, acid-base indicators

Optical chemical sensors

Analytical methods, modeling, readout and software for chemical sensors, analytical microsystems, signal processing in chemical sensors and applications in the food industry, medicine, pharmacy, environmental monitoring, corrosion, process control, *etc.* and other related science and technology
