biosensors

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Jeff D. Newman

Message from the Editor-in-Chief

Biosensors is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized.

Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **Thorough Peer-Review**
-  **Coverage by Leading Indexing Services** MEDLINE (NLM), Pubmed (NLM), Scopus (Elsevier)
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors
-  **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI Institutional Open Access Program (IOAP)
-  **High Visibility** Indexed in Emerging Sources Citation Index (ESCI-Web of Science)

Aims and Scope

Biosensors (ISSN 2079-6374) provides an advanced forum for studies related to the science and technology of biosensors and biosensing. It publishes original research papers, comprehensive reviews and communications.

The scope of *Biosensors* includes:

- Biological or biologically inspired sensors
- Biosensors based on electrochemical, optical, piezoelectric, thermal, magnetic or micromechanical
- DNA chips, lab-on-a-chip, microfluidics, nanobiosensors, biosensor fabrication, biomaterials, biosensor interfaces and membrane technology
- In vitro* and *in vivo* applications
- Instrumentation, signal treatment and uncertainty estimation in biosensors
- Biosensors for: medicine; biomedical research; environment; security and defense; food; process industries and drug discovery
