Message from the Editorial Office

Fibers is intended as an integrative platform, bringing together specialists with expertise concerning a large range of biological, synthetic, metallic and mineral fibers. The intent is to bring together scientists who would otherwise be unlikely to encounter each other's findings. By facilitating communication across specialties, the journal will advance understanding of the underlying commonality of many physical and chemical aspects of fibers.

We welcome submission of manuscripts from a diverse range of disciplines relating to many types of fibers utilizing a variety of research approaches.

Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **Rapid Publication**
-  **Thorough Peer-Review**
-  **Coverage by Leading Indexing Services** ESCI (Clarivate Analytics) CAS-Chemical Abstracts (ACS), DOAJ-Directory of Open Access Journals, INSPEC(IET), Polymer Library (Smithers Rapra)
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors

Aims and Scope

Fibers (ISSN 2079-6439) is a journal that publishes original articles, critical reviews, research notes and short communications on the materials science and all other empirical and theoretical studies of fibers, providing a forum for integrating fiber research across many disciplines.

The scope of *Fiber* includes:

- Textile fibers
- Natural fibers and biological microfibrils
- Metallic fibers
- Optic fibers
- Carbon fibers
- Silicon carbide fibers
- Fiberglass
- Mineral fibers
- Cellulose fibers
- Polymer fibers
- Microfibers, nanofibers and nanotubes
- New processing methods for fibers
- Chemistry of fiber materials
- Physical properties of fibers
- Exposure to and toxicology of fibers
- Biokinetics of fibers
- The diversity of fiber origins
