Risks is published in open access format – research articles, reviews and other content are released on the internet immediately after acceptance. Specifically, *Risks* welcomes contributions that (a) contribute with insight, outlook, understanding and overview – no matter how simple they are; (b) show creativity in pedagogical tricks and techniques; (c) help the transfer of theoretical research to public and private application; (d) show responsibility for societal impact. The scientific community and the general public have unlimited free access to the content as soon as it is published.
