Message from the Editor-in-Chief

Toxics is an international, peer-reviewed, open access journal which provides a forum for studies related to all aspects of toxicants, including exposure, biomarkers, kinetics, biological effects, fate and transport, treatment, and remediation. Accordingly, please consider *Toxics* when submitting your work on: *in vitro* studies, studies using experimental animal or non-animal models, studies of humans or other biological populations, and mathematical modeling studies.

Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **Coverage by Leading Indexing Services** ESCI-Emerging Sources Citation Index (Clarivate Analytics); Scopus (Elsevier); PubMed(NLM)
-  **Thorough Peer-Review** All submitted manuscripts undergo rigorous peer-review prior to publication
-  **Fast Publication** manuscripts are peer-reviewed and a first decision provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in 2017).
-  **No Space Constraints** No restriction on the length of the papers

Aims and Scope

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. Electronic files or software supporting the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

The scope of *Toxics* includes:

- Toxic chemicals
- Toxic elements
- Air toxics
- Hazardous wastes
- Persistent organic pollutants
- Toxic chemical mixtures
- Carcinogenic metals
- Radionuclides
- Endocrine disrupting chemicals
- Any other toxic substances
