# batteries

an Open Access Journal by MDPI

## Editor-in-Chief

Prof. Dr. Andreas Jossen

## Message from the Editor-in-Chief

Take the opportunity to publish your original scientific work or a review paper concerning battery materials, battery technology or battery application within this new open access journal. Along with material science, the journal also addresses engineering and multidisciplinary research topics, such as cell and system design or storage system integration. Publishing proffers visibility for the benefit of other experts and facilitates discussion of the research results within the field. You are invited to publish your work, read published papers and to participate in topical discussions.

## Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **Coverage by Leading Indexing Services** ESCI-Emerging Sources Citation Index (Clarivate Analytics, formerly Thomson Reuters), Inspec (IET)
-  **Rapid Publication** Manuscripts are peer-reviewed and a first decision provided to authors approximately 36 days after submission; acceptance to publication is undertaken in 14 days (median values for papers published in this journal in 2017)
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **Free Publication** No Article Processing Charges (APC) for well-prepared manuscripts submitted in 2018
-  **Thorough Peer-Review**
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors

## Aims and Scope

*Batteries* is an international, open access journal of battery technology and materials. It aims to provide a central vehicle for the exchange and dissemination of new ideas, technology and material developments, and research results in the field of battery technology between scientists and engineers throughout the world. The emphasis is placed on original research, both analytical and experimental, covering all aspects of primary and secondary batteries, including chemical batteries and thermal batteries, etc.

- Battery electrochemistry
- Cell design and stack technology
- Battery systems and applications
- Battery performance and testing
- Charging technologies
- Battery monitoring, management and diagnostics
- Hybrid battery systems
