## Editor-in-Chief

Prof. Dr. Josep Samitier  
jsamitier@ibecbarcelona.eu

1. Nanobioengineering group, Institute for Bioengineering of Catalonia (IBEC), Baldiri Reixac 10-12, 08028 Barcelona, Spain;
2. Department of Engineering: Electronics, Universitat de Barcelona, Barcelona, Spain;
3. Networking Biomedical Research Center (CIBER), Spain

## Message from the Editor-in-Chief

Welcome to *Biomimetics*, an open access journal regarding biomimicry and bionics. We are dedicated to research that relates to the most basic aspects of living organisms and the transfer of their properties to human applications. We aim to provide a forum and a survey for researchers and professionals interested in exploiting biologically inspired designs in engineering systems, technology and biomedicine.

## Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **Free Publication** for well-prepared manuscripts submitted in 2018
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **Thorough Peer-Review**
-  **Rapid Publication** Accepted papers are immediately published online
-  **High visibility** Indexed in the Emerging Sources Citation Index (ESCI - Web of Science) and Chemical Abstracts (CAS)
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors

## Aims and Scope

*Biomimetics* (ISSN 2313-7673) publishes articles, reviews and short communications. Authors in the fields of material science, mechanical engineering, nanotechnology and biomedicine are all invited to submit experimental and theoretical results about research, design and application of principles from nature aimed to developing novel solutions that enable sustainable innovation.

*Biomimetics* invites submissions on a wide range of topics, including but not limited to:

- Biomimetic mechanism and design
- Biomimetic robotics
- Biofabrication and characterization
- Biomimetic and bioinspired chemistry
- Biosensing
- Nanotribology, nanomechanics, micro/nanoscale studies
- Plant biomechanics
- Synthetic systems
- Self-organization and cooperative behavior
- Tissue engineering
- Bioinspired, biomedical and biomolecular materials
