Multimodal Technologies and Interaction

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Mark Billinghurst

Message from the Editor-in-Chief

Towards the end of 2018, I was approached to be the new Editor-in-Chief for the *Multimodal Technologies and Interaction (MTI)* journal. I was honored to be considered and happily accepted the role, starting in January 2019.

MTI is a new journal, and since starting in 2017, has published 10 issues with over 140 papers, with the number of publications continuing to grow. As Editor-in-Chief, I would like to continue increasing the number of high-quality papers that we publish, and in addition, work towards improving the journal in other ways, such as getting the journal listed on ISI, establishing an impact factor, and increasing our social media presence.

I would also like to better engage with the research community, including bringing some new members onto the Editorial Board, focusing the journal on the latest areas of interest, marketing at leading conferences and, most importantly, getting feedback from our readers.

Author Benefits

Open Access Unlimited and free access for readers

No Copyright Constraints Retain copyright of your work and free use of your article

Thorough Peer-Review

No Space Constraints, No Extra Space or Color Charges No restriction on the length of the papers, number of figures or colors

Member of the Committee on Publication Ethics (COPE)

Aims and Scope

Multimodal Technologies and Interaction (ISSN 2414-4088) is an international, multi/interdisciplinary, open access, peerreviewed journal. *MTI* focuses on fundamental and applied research dealing with all kinds of technologies that can acquire and/or reproduce unimodal and multimodal digital content that supports interaction (e.g. human–computer, human–robot and animal– computer). The scope of *MTI* includes, but is not restricted to:

- Displays/sensors: visual, tactile/haptic, sonic, taste, smell
- Multimodal interaction, interfaces, and communication
- Human–computer and human–robot relations and interaction
- Animal–computer interaction
- Human factors, cognition
- Multimodal perception
- Smart wearable technology
- Psychology and neuroscience
- Digital and sensory marketing
