an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Ulrich Berger

Message from the Editor-in-Chief

Games is an international, peer-reviewed, quick-refereeing, open access journal (free for readers), which provides an advanced forum for studies related to strategic interaction, game theory and its applications, and decision making. *Games* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published.

Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **Thorough Peer-Review**
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors
-  **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI Institutional Open Access Program (IOAP)

Aims and Scope

The aim is to provide an interdisciplinary forum for all behavioral sciences and related fields, including economics, psychology, political science, mathematics, computer science, and biology (including animal behavior). Games publishes regular research articles, reviews and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. Therefore, there is no restriction on the length of the papers. For theory papers, full details of proofs must be provided so that results can be checked. For experimental papers, full experimental details must be provided so that the results can be reproduced.

The scope of *Games* includes:

- Game theory in general and its applications in diverse areas
- Topics in noncooperative game theory
- Behavioral game theory and related fields
- The study of competition and market institutions
- The journal is also open to other special topics related to game theory
