An Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Paolo Bellavista

Message from the Editor-in-Chief

You are invited to contribute a research article, a comprehensive review or a software paper for consideration and publication in *Computers* (ISSN 2073-431X). *Computers* is an international, peer-reviewed, open access journal which provides an advanced forum for computer sciences. *Computers* is published in open access format— research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI Institutional Open Access Program
-  **Thorough Peer-Review**
-  **High Visibility** Index in the Emerging Sources Citation Index (ESCI-Web of Science) INSPEC (IET) and DBLP
-  **Coverage by Leading Indexing Services** Scopus (Elsevier)
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors

Aims and Scope

Computers (ISSN 2073-431X) publishes reviews, regular research papers, short communications and software papers. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced.

The scope of *Computers* includes:

- Computer science
- Computer engineering
- Hardware components and architecture
- Software systems and architectures
- Networking and communications
- Multiprocessing, multithreading, virtualization, and containers
- Cloud and edge computing
- Resource, systems, and service management
- Artificial intelligence
- Big data science and computation
- Computer vision
- Programming languages
- Graphics and Human Computer Interaction
- Security and privacy
- Performance evaluation of computer systems
- Scalability and case studies of widely deployed applications
