# particles

an Open Access Journal by MDPI

## Editor-in-Chief

Prof. Dr. Roy A. Lacey

1. Department of Chemistry,  
Stony Brook University, Stony  
Brook, New York 11794-3400,  
USA

2. Department of Physics, Stony  
Brook University, Stony Brook,  
New York 11794-3800, USA

## Associate Editors

Prof. Dr. Armen Sedrakian

Frankfurt Institute for Advanced  
Studies (FIAS), D-60438 Frankfurt  
am Main, Germany

Prof. Dr. David Blaschke

1. Institute of Theoretical  
Physics, University of Wrocław,  
50-204 Wrocław, Poland

2. Bogoliubov Laboratory of  
Theoretical Physics, Joint  
Institute for Nuclear Research,  
141980 Dubna, Russia

3. National Research Nuclear  
University (MEPhI), 115409  
Moscow, Russia

## Message from the Editorial Board

*Particles* (ISSN 2571-712X) is an open access journal covering all aspects of nuclear physics, particle physics, experimental/theoretical high-energy physics and astrophysics. A primary objective of *Particles* is to encourage, facilitate and disseminate detailed accounts of experimental and theoretical findings by scientists across the globe. High quality, innovative, pioneering and relevant manuscripts are currently being invited. *Particles* adheres to rigorous peer-review and publishes high quality and cutting-edge research in the format of research articles, review papers, letters or short communications. Our goal is to enable rapid dissemination of high impact works to the scientific community.

## Author Benefits

**Open Access** Unlimited and free access for readers

**No Copyright Constraints** Retain copyright of your work and free use of your article

**Thorough Peer-Review**

**No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors

## Aims and Scope

*Particles* is a peer-reviewed, open access journal devoted to the publication of original research papers, review articles, and communications related to new results and progress in the domain of nuclear physics and particle physics. Topics also include experimental/theoretical high-energy physics and astrophysics. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. Therefore, there is no restriction on article length. Full experimental details must be provided to enable the results to be reproduced. Electronic files or software supporting the details of calculations and experimental procedures can be deposited as supplementary materials along with the publications.

- Nuclear structure, reactions and dynamics
- Nuclear forces and few-body systems
- Rare decays and fundamental symmetries
- Nuclear astrophysics
- Intermediate and high energy heavy ion physics
- Condensed matter theories in particle physics
- Experimental data processing
- Particle detection
- Particle accelerators
- Novel hardware solutions
- Lattice field theory
- Hadronic physics and QCD
- High-energy particle physics
- Neutrino physics
- Astroparticle physics
- Particle physics in cosmology
- Quantum field theory methods in particle physics
- Statistical physics of elementary particles
