an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Paul Sylvester

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **Thorough Peer-Review**
-  **Coverage by Leading Indexing Service** SCIE-Science Citation Index Expanded (Clarivate Analytics)
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors
-  **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI Institutional Open Access Program (IOAP)

Aims and Scope

Minerals (ISSN 2075-163X) is an international open access journal that covers the broad field of mineralogy, economic mineral resources, mineral exploration, innovative mining techniques and advances in mineral processing. It publishes reviews, regular research papers and short notes. Scientists are encouraged to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers.

Subject Areas:

- Mineralogy and mineral resources
- Advances in mineral analytical techniques
- New minerals and mineral data
- Gems and gem deposits
- Biomineralogy
- Industrial minerals
- Exploration and mining geology
- Mining, technology and mineral engineering
- Mineral metallurgy
