The European Society for Fuzzy Logic and Technology (EUSFLAT) is affiliated with Axioms.
Axioms is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of Axioms is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

Author Benefits

- **Open Access** Unlimited and free access for readers
- **No Copyright Constraints**
- **Thorough Peer-Review**
- **Rapid Publication**
- **Coverage by Leading Indexing Services** Indexed by the Emerging Sources Citation Index (ESCI - Web of Science) and Zentralblatt MATH (FIZ Karlsruhe). Added in Scopus from Vol. 6.
- **No Space Constraints, No Extra Space or Color Charges**
- **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI Institutional Open Access Program
Aims and Scope

*Axioms* (ISSN 2075-1680) is an international, open access journal which provides an advanced forum for studies related to mathematics, mathematical logic and mathematical physics. It publishes reviews, research papers and short communications.

The scope of *Axioms* includes:

- Axiomatization, axiomatic methods, theorems, mathematical proofs
- Algebraic structures, field theory, group theory, topology, vector spaces
- Mathematical analysis
- Mathematical physics
- Mathematical logic, and non-classical logics, such as fuzzy logic, modal logic, non-monotonic logic, etc.
- Classical and fuzzy set theories
- Number theory
- Systems theory
- Classical measures, fuzzy measures, representation theory, and probability theory
- Graph theory
- Information theory
- Differential equations and dynamical systems
- Mathematical problems of artificial intelligence
- Complex networks from a mathematical viewpoint
- Interdisciplinary applications of mathematical theory
