## Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

*Entropy* is an online open access journal providing an advanced forum for the development and /or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

## Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **High Speed** 53.5 days from submission to publication
-  **Coverage by Leading Indexing Service** Science Citation Index Expanded (Web of Science), MathSciNet (AMS), Scopus (Elsevier)
-  **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI Institutional Open Access Program
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors

## Aims and Scope

*Entropy* (ISSN 1099-4300) is an international and interdisciplinary journal of entropy and information studies. It deals with the development and/or application of entropy or information-theoretic concepts in a wide variety of applications.

Relevant submissions ought to focus on one of the following:

- Develop the theory behind entropy or information theory
- Provide new insights into entropy or information-theoretic concepts
- Demonstrate a novel use of entropy or information-theoretic concepts in an application
- Obtain new results using concepts of entropy or information theory

Some common subject or application areas include:

- Physics and Engineering
- Computing
- Information Theory
- Chemistry and Biology
- Complex Systems
- Economics
- Machine Learning and Systems Theory
