Editor-in-Chief

Prof. Dr. Hugo F. Lopez

College of Engineering & Applied
Science, University of Wisconsin-
Milwaukee, USA

Message from the Editor-in-Chief

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure—disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **Thorough Peer-Review**
-  **Coverage by Leading Indexing Services** SCIE-Science Citation Index Expanded (Clarivate Analytics), INSPEC (IET), Scopus (Elsevier)
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors
-  **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI Institutional Open Access Program

Aims and Scope

Metals publishes reviews, regular research papers (articles) and short communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. Therefore, there is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced.

Metals provides a forum for publishing papers which advance the in-depth understanding of the relationship between the structure, properties, or functions of all kinds of metals.

The scope of *Metals* includes:

- Metallurgy
- Alloys
- Base metals (including iron, nickel, lead and zinc)
- Ferrous and non-ferrous metals
- Noble metals (including tantalum, gold, platinum, silver and rhodium)
- Precious and transition metals
- Metalloids
- Semi-metals
- Metallicity
- Rare and synthetic metals
- Applications and trade
