The International Society of Doctors for the Environment (ISDE) and the Italian Society of Environmental Medicine (SIMA) are affiliated with the International Journal of Environmental Research and Public Health.
Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
Aims and Scope
We focus on the publication of scientific and technical information about the environmental and occupational correlations of health and disease, the relationship between environmental health and the quality of life, as well as the socio-cultural, political, economic and legal considerations related to environmental stewardship and public health.

The Primary Areas of *IJERPH* include:
- Gene–environment interactions
- Environmental genomics and proteomics
- Environmental toxicology, mutagenesis and carcinogenesis
- Environmental epidemiology and disease control
- Health risk assessment and management
- Ecotoxicology, and ecological risk assessment and management
- Emerging issues in environmental health and disease
- Environmental education and public health
