an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Message from the Editorial Board

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **Thorough Peer-Review**
-  **Impact Factor 2.676** (2017 Journal Citation Reports®)
-  **Rapid Publication** Submission to 1st decision within 24.3 days, acceptance to publication within 6.9 days (median values for papers published in this journal in 2017)
-  **Coverage by Leading Indexing Service** SCIE-Science Citation Index Expanded (Clarivate Analytics), Ei Compendex (Elsevier), Scopus (Elsevier)
-  **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI Institutional Open Access Program
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors

Aims and Scope

Energies aims to be a leading peer-reviewed platform and an authoritative source of information for analyses, reviews and evaluations related to energy engineering and research.

The journal covers research in energy engineering and sciences, with a strong focus on energy storage and conservation, biomass and bioenergy, renewable energy, electricity supply and demand, energy in buildings, and on economic and policy issues. The journal also welcomes papers on related topics such as energy modelling and prediction, integrated energy systems, energy planning and management, provided such topics are within the context of the broader multi-disciplinary scope of energy.

- Energy Fundamentals
- Primary Energy Sources
- Renewable Energy
- Energy Exploration and Exploitation
- Energy Conversion Systems
- Energy Policy
- Exergy
- Energy Research and Development
