Environmental issues are quickly becoming central political, economic and academic topics of the twenty-first century. A large number of modern challenges are directly or indirectly caused by complex interactions between environmental issues. Such issues require interdisciplinary research, knowledge and insights to understand and, ultimately, for solutions to be found. Through the journal Environments, we strive to create a platform for meaningful discourse by accepting contributions from a wide range of fields. We sincerely hope you will consider publishing your distinguished work in this highly-accessible, peer-reviewed journal.

Open Access  Unlimited and free access for readers

No Copyright Constraints  Retain copyright of your work and free use of your article

High Visibility  Indexed by the Emerging Sources Citation Index (ESCI - Web of Science)

Thorough and Rapid Peer-Review

Rapid publication  Manuscripts are peer-reviewed and a first decision provided to authors approximately 20 days after submission; acceptance to publication is undertaken in 4 days (average values for papers published in 2018)

No Space Constraints, No Extra Space or Color Charges  No restriction on the length of the papers, number of figures or colors

Discounts on Article Processing Charges (APC)  If you belong to an institute that participates with the MDPI Institutional Open Access Program

Member of the Committee on Publication Ethics (COPE)
Aims and Scope

*Environments* (ISSN 2076-3298) is an international and cross-disciplinary scholarly, open access journal focusing on the advances, issues and challenges related to environmental systems. Our aim is to encourage scientists and engineers to publish their experimental, theoretical, novel practical results in a variety of areas that range from environmental conservation, environmental technologies, ecosystem services, risk, policy, governance, monitoring and modelling of environmental systems, stakeholder engagement and decision support. There is no restriction on the length of the papers.

Subject areas include:

- Environmental conservation
- Environmental technologies and methodologies
- Environmental protection and pollution prevention
- Environmental modeling and technology
- Environmental management and policy
- Environmental impact and risk assessment
- Environmental change and conservation
- Environmental analysis and monitoring
- Ecosystem services, biodiversity and natural capital
- Environmental economics
- Development and application of environmental data, information, tools and decision support systems
