Message from the Editor-in-Chief

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The Journal of Clinical Medicine’s (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal’s full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

- **Open Access** Unlimited and free access for readers
- **No Copyright Constraints** Retain copyright of your work and free use of your article
- **Thorough Peer-Review**
- **Coverage by Leading Indexing Services** Science Citation Index Expanded (SCIE - Web of Science), PubMed (NLM), PubMed Central (NLM)
- **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors
- **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI Institutional Open Access Program
Aims and Scope

The *Journal of Clinical Medicine* (ISSN 2077-0383), is an international scientific open access journal, providing a platform for advances in health care/clinical practices, the study of direct observation of patients and general medical research. This multi-disciplinary journal is aimed at a wide audience of medical researchers and healthcare professionals.

Unique features of this journal:
(1) Original research articles are particularly welcomed. JCM also accepts reviews and case reports.
(2) There is no limit to publication length: our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible.

The scope of *JCM* includes:

- Clinical Laboratory Diagnosis and Therapy of Internal Medicine Diseases
- Traumatology and Precise Surgical Techniques
- Genomics, Proteomics, and Bioinformatics in Clinical Cancer Research
- Epidemiology
- Neurological and Psychiatric Disorders
- Advanced Research in Dermatology and Venereology
- Ophthalmology and Otolaryngology
- Medical Imaging and Nuclear Medicine
- Rehabilitation Medicine and Physiotherapy
- Sports Medicine
- Pediatric and Geriatric Emergency Care
- Women’s Health
