

Supplementary Materials: Variation in the Oral Processing of Everyday Meals is Associated with Fullness and Meal Size; A Potential Nudge to Reduce Energy Intake?

Danielle Ferriday, Matthew L. Bosworth, Nicolas Godinot, Nathalie Martin, Ciarán G. Forde, Emmy Van Den Heuvel, Sarah L. Appleton, Felix J. Mercer Moss, Peter J. Rogers and Jeffrey M. Brunstrom

Figure S1. Images of the 400-kcal portions for each of the 20 test meals, as served.

Text S1. Script in Matlab to process the continuous meal-weight data.

```
%Matlab code example for Study 1 fixed portion meals - functions appear
at the end
```

```
%Experimenter defines the start and end point of the meal
```

```
load('Raw data file location')
```

```
for i = 1:12
```

```
    for j = 1:20
```

```
        d = mark_points1(raw_weight_data {i,j});
```

```
        startX(i,j) = d(1,1);
```

```
        endX(i,j) = d(1,2);
```

```
        save(['Save location'], 'startX', 'endX');
```

```
    end
```

```
end
```

```
%Then the raw data is trimmed, filtered, plotted, inverted to form a CIC
and a quadratic equation is fitted.
```

```
load('Raw data file location')
```

```
load('Marked data file with start and end points of the meal')
```

```
for i = 1:12
```

```
    for j = 1:20
```

```
        trimmed_data = trim_weight(raw_weight_data {i,j},
        round(startX(i,j)), round(endX(i,j)));
```

```
        cic = filter_weight2(trimmed_data)';
```

```
        cic = -cic;
```

```
        cic = cic-cic(1); %
```

```
        [fitresult, gof1] = createFit([1:length(cic)], cic,1);
```

```
        Coeff_1(i,j) = fitresult.p1;
