Bee collected pollen with enhanced health benefits, produced by fermentation with a Kombucha consortium.

**Figure S1.** Light micrographs of NCTC clone L929 cells untreated (a) and treated with different concentrations of atomized product: 20 mg/ml (b), 25 mg/ml (c) and 30 mg/ml (d).

**Figure S2.** Light micrographs of Hep-2 cells untreated (a) and treated with different concentrations of atomized product: 15 mg/ml (b), 20 mg/ml (c) and 30 mg/ml (d).
Figure S3. Light micrographs of Caco-2 cells untreated (a) and treated with different concentrations of atomized product: 10 mg/ml (b), 15 mg/ml (c) and 20 mg/ml (d).
